

TeleTrade VIP Program Rules

TeleTrade VIP is a loyalty program that defines the terms of cooperation between the company and the client, as well as access to various services and promotions based on VIP status levels:

- **VIP**
- **VIP Gold**
- **VIP Platinum**

Status Assignment

- The corresponding VIP status is assigned to a client when they fund their trading account from external sources (internal transfers are excluded) if, after the funds are credited, the account balance exceeds the threshold specified in the program terms in the Personal Account section.
- Status can also be granted as part of marketing and promotional campaigns conducted by the company or its partners, based on requests from partners.

Status Removal

- VIP status is automatically removed if the client makes a withdrawal from their trading account to external details.
- The company reserves the right to revoke VIP status at its discretion if it considers that the client is abusing the terms of the VIP program.
